

Spatec® FAQ and Answers

1. What is the best way to use the Spatec®? *Add weekly for best results and follow label dosage directions.*
2. Can you use Spatec® with bromine or chlorine? *Yes. Spatec® has a strong synergy with bromine and chlorine which helps to improve sanitation and water clarity. This powerful synergy allows users to use up to 50% sanitizer which also helps make the spa water feel more comfortable to bathers.*
3. Is Spatec® EPA registered. *Yes. It is classified as an algacide but the product is also a broad-spectrum bactericide.*
4. Is Spatec® a water clarifier? *Spatec® clarifies spa water do to its unique and highly effective flocculation (clarification) of spa water particles to create ultra-clear water.*
5. Do I need to use a phosphate remover when using Spatec® ? *No need to use a phosphate remover as Spatec® both kills and prevents algae growths. Note: phosphate removers have not yet been proven to prevent algae growth; although they are a component of fertilizers, it is nitrogen that causes algae to grow.*
6. I added Spatec® and Beautec® for Spas together and the spa water turned hazy and cloudy, please explain what is going on? *Although both products should be added separately on different days, this is a normal reaction. The spa water will again turn clear in a day or two but the spa can be used immediately.*
